

HR Analytics Dashboard using Microsoft Excel

Project Overview

The **HR Analytics Dashboard** is an interactive dashboard developed in **Microsoft Excel** to analyze employee demographics, workforce distribution, and attrition trends. The dashboard enables HR professionals to monitor key performance indicators (KPIs), identify workforce patterns, and make data-driven decisions to improve employee retention.

Objective

The primary objective of this project is to:

- Analyze employee attrition and workforce demographics.
- Track important HR Key Performance Indicators (KPIs).
- Provide interactive visualizations for HR decision-making.
- Identify departments and employee groups with high attrition.
- Build an easy-to-use dashboard using Microsoft Excel.

Dataset Information

The dashboard is built using an HR employee dataset containing information about employees such as:

- Employee ID
- Gender
- Age
- Department
- Job Role
- Marital Status
- Attrition Status
- Job Satisfaction

Dataset Size

- Total Employees: **1470**
- Active Employees: **1233**
- Employees Left: **237**

Tools & Technologies

- Microsoft Excel
- Pivot Tables
- Pivot Charts
- Slicers
- Conditional Formatting
- Excel Formulas
- Data Cleaning

Dashboard Features

The dashboard provides the following interactive visualizations:

KPI Cards

- Total Employees
- Active Employees
- Attrition Count
- Attrition Rate
- Average Age
- Job Satisfaction Rating

Employee Demographics

- Employee Distribution by Gender
- Education-wise Attrition
- Department-wise Attrition
- Age Group-wise Attrition
- Job Role-wise Attrition
- Marital Status-wise Attrition

Interactive Filters

Users can filter the dashboard using:

- Job Role
- Department
- Gender

Business Questions Answered

The dashboard helps answer important HR questions such as:

- What is the overall employee attrition rate?
- Which department experiences the highest attrition?
- Which age group has the maximum employee turnover?
- Which education level contributes the highest attrition?
- Which job roles are leaving the organization the most?
- Does marital status affect employee attrition?
- What is the gender distribution of employees?

Key Insights

Based on the dashboard:

- Total workforce consists of **1470 employees**.
- Overall employee attrition rate is **16%**.
- Sales department experiences the highest employee attrition.
- Employees aged **25–34 years** show the highest turnover.
- Bachelor's degree holders contribute the highest number of attrition cases.
- Single employees have higher attrition compared to married and divorced employees.
-

Conclusion

This project demonstrates how Microsoft Excel can be used to build an interactive HR Analytics Dashboard for analyzing workforce data. The dashboard provides valuable insights into employee attrition, demographics, and departmental trends, enabling HR teams to make informed decisions that improve employee retention and organizational performance.
